23 MAY 2017

# Is big bankable

Understanding  
Breeder Size to  
Optimise Profitability

INFO DAY

*The impact of breeder size on the profitability of beef, wool and sheep meat production is not fully understood by these industries.*

*In an attempt to address this Yalgoo Partnership is sponsoring an information day, which will present the critical issues applicable to those three industries.*

There will be presentations from three specialist speakers.

**Dr. John Webb-Ware**  
Senior Consultant, Mackinnon Project  
University of Melbourne  
Beef Cattle

**John Keiller**  
Cashmore Oaklea Cashmore, Victoria  
Meat Sheep

**Grant Burbidge**  
Connemara, Tarcutta NSW  
Wool Sheep

In addition, there will be presentations from

**Dr Phil Holmes**  
Homes and Co.

**Angus Warden**  
Minchin Moore Private Wealth

For more information on these speakers please see [www.yalgoogenetics.com.au](http://www.yalgoogenetics.com.au)

The objective of the information day, will be to help attendees gain a better understanding of:

- **Why optimising stocking rate is the primary task in the pursuit of profitability.**
- **The role played by breeder size on pasture intake and determining the number of animals that can be grazed.**
- **Relationships between breeder size and kg's of beef, sheep meat and wool production.**
- **Why breeders do not have to be big to be highly fertile.**
- **The significance of breeder size on surplus breeder income.**

All of these technical issues will be referenced to economic outcomes and the implication they have for further wealth creation.
